

Experienced technology and business executive with expertise in multiple industries, including large venue management, gaming, aviation, education and hospitality. MBA with a combination of business knowledge, technical acumen and the ability to communicate across all levels of an organization.

CAREER HIGHLIGHTS

FOUR SEASONS HOTEL — MINNEAPOLIS, MINNESOTA

Director of Information Technology, 2021–2022, fourseasons.com

Led technology implementation for the first Four Seasons hotel in Minnesota, including data center buildout, wired and wireless networks, phone and television systems, point of sale and reservation systems, in-room iPads, digital signage and music, security cameras, access control and meeting room audio/video. Coordinated vendors, contractors and visiting technology staff to successfully open on schedule.

U.S. BANK STADIUM — MINNEAPOLIS, MINNESOTA

Director of Information Technology, 2015–2021, usbankstadium.com

Key original member of executive team that opened \$1.1 billion sports and entertainment venue on-time and on-budget. Responsible for \$100 million in stadium technology, including primary data center, 62 IDF closets, 200 Cisco switches, 1200 wireless access points, 2100 IP televisions, 700 IP telephones, 850 iOS devices, 450 IP security cameras and 200 workstations and laptops. Successfully hosted Super Bowl LII and the 2019 NCAA Final Four, setting new stadium WiFi traffic records.

FORTUNE BAY RESORT CASINO — TOWER, MINNESOTA

Director of Information Technology, 2010–2015, fortunebay.com

Provided effective leadership to the Bois Forte Development Corporation and Reservation Tribal Council, including expense management, strategic planning and policy creation. Responsible for overall availability of technology systems for 24/7/365 casino and hotel operations, including wired and wireless networks and point of sale, hotel reservation and player marketing systems. Provided technical support to The Wilderness at Fortune Bay, rated among the top 100 public golf courses in the nation. Designed and published internal and external fortunebay.com websites and all corporate social media accounts. Assisted with concerts, marketing promotions, food and beverage operations, radio broadcasting and convenience store management.

HIGH SCHOOL FOR RECORDING ARTS — SAINT PAUL, MINNESOTA

Technology Director, 2003–2009, hsra.org

Designed and coded Project Excellence, a web-based student information management system. Re-engineered entire technology infrastructure, including workstations, servers, security cameras, network and phone system. Wrote and implemented technology plan for Los Angeles expansion school and served as technology director for both schools. Raised critical annual funding via the FCC E-rate program. Built multi-server development and production environment co-located in a Seattle data center and diversified into web services through spin-off company Code.mn.

NORTHWEST AIRLINES — EAGAN, MINNESOTA

Manager, line maintenance automation, 2001–2003

Senior technology specialist, fuel and corporate services, 1996 – 2001

Manager, general credit, 1993 – 1996

Senior collector, universal air travel plan, 1992 – 1993

New accounts clerk, freight credit, 1991 – 1992

Started airline career as a college intern in the Sons and Daughters program, working in passenger refund and credit departments. After graduation, returned to the credit department as a freight credit clerk and senior collector on UATP (Universal Air Travel Plan) credit card accounts. As credit manager, supervised staff of seven credit clerks and managed 17 general ledger accounts with balances up to \$25 million and annual billings of more than \$530 million. Designed executive reporting system for \$175 million receivables financing project, ensuring “AA” certificate rating and reduced cost of funds. As technology specialist for the fuel department, utilized many unique Apple technologies to manage \$1 billion annual fuel expense. In technical operations, managed 95 servers and workstations worldwide. Built an aircraft maintenance intranet reporting system that resulted in annual budget savings of \$900,000.

7 MINUTE MILES, LLC — EAGAN, MINNESOTA

Owner, 1997–2010

Founded and incorporated software and new media company focused on the golf industry (originally Golden Links Publishing Limited). Visited more than 350 Minnesota public golf courses and created a photo library with thousands of images. Introduced multimedia CD-ROM golf guide at the 1999 Great Minnesota Golf Show to critical acclaim (“the most comprehensive look at golf courses ever done in Minnesota for the consumer”) and later launched GoldenLinksGolf.com. Company name was changed to 7 Minute Miles, LLC, focused on technology consulting and web publishing (specializing in Apple and open source tools). Formed the MN Publishing Company, which designed and published Minnesota golf, hockey, running and skiing web sites.
